EDUCATION

Shri Sant Gajanan Maharaj College of Engineering
Bachelor of Engineering in Electronics and Telecommunication

Shegaon, India
Sept 2022 – Present

TECHNICAL SKILLS

Programming Languages: Python, C, C++, HTML, CSS
Frameworks & Libraries: Pandas, NumPy, Scikit-learn, Tensorflow, REST APIs, FastAPI
DevOps & Cloud: Docker, Kubernetes, GitHub Actions
Software/Tools: Git, GitHub, Postman, QGIS, Jupyter Notebooks, Figma
Core CS: Data Structures and Algorithms, Object Oriented Programming, Data Modeling, Data Analytics

EXPERIENCE

Apexa iQ

March 2025

DevOps & Automation Intern

- Optimized operational workflows by developing and testing **Python automation scripts** using Selenium and Pytest.
- Containerized applications using Docker within a cybersecurity-focused DevOps lifecycle and supported CI/CD workflows to ensure consistent deployment environments.

OneSmarter Inc

April 2023 – February 2024

AI & ML Intern

- Led a cross-functional team of 4 to deliver **AI-driven solutions** for international clients based in the USA and Israel.
- Collaborated with stakeholders to define product requirements, utilizing **NLP techniques** to enhance core product capabilities and functionality.

KEY PROJECTS

- Saraav – Edtech Platform** *React.js, TypeScript, Firebase, Tailwind CSS* | [Link](#)
Developed and launched a full-stack ed-tech platform (saraav.in) tailored for SGBAU engineering students.
 - Scaled the platform to **500+ registered users** and over **20,000+ page visits**.
 - Implemented AI-driven content generation utilizing Python scripts to automate comprehensive study material creation.
 - Managed the complete SDLC including architecture design, deployment, CI/CD workflows, and performance optimization.
- Solar Panels Detection (ISRO Dataset)** *TensorFlow, Python, CNNs, U-Net, QGIS* | [Link](#)
Detected solar parks from geospatial images using ISRO's LISS4 sensors dataset.
 - Engineered a **U-Net architecture** with a MobileNet-V2 backbone for accurate semantic segmentation.
 - Competed and represented the solution at the GeoSpatial AI challenge at VNIT Nagpur, organized by **ISRO**.
- Amazon Reviews Scraper & Analysis** *Python, Docker, Splash JS, Selenium* | [Link](#)
Built a scalable web scraping engine to extract product reviews and analyze customer sentiment.
 - Utilized Splash JS with Docker, BeautifulSoup v4, requests, and pandas to reliably scrape dynamic Amazon pages.
 - Conducted data analysis utilizing **LLMs (Claude/ChatGPT)** to generate comprehensive product insights and sentiment analysis for business intelligence.

PATENTS, PUBLICATIONS & AWARDS

- Patent (Pub. No. 202523064402 A):** *System for Mapping of Flood and Early Warning Configuration by Means of a UAV.* Published Aug 2025 (Awaiting Grant). Designed a UAV-based system integrating AI models (CNNs, LSTMs) and ArcGIS for real-time forecasting and damage assessment.
- 2nd Prize, SGBAU Avishkar Competition:** Secured university-level recognition and qualified for the State Competition.

VOLUNTEERING & LEADERSHIP

- AI/ML Lead, Google Developer Groups SSGMCE:** Delivered technical workshops on AI/ML to 60+ students. Represented the team at the Google Solution Challenge 2023 at T-Hub, Hyderabad. (*Aug 2023 – Sep 2025*)

CERTIFICATIONS

- Top 1% Elite Certificate:** NPTEL Deep Learning (IIT Ropar)
- Google Cloud:** Data Analytics Certificate & Cloud Computing Foundations Certificate
- Machine Learning:** NPTEL Introduction to Machine Learning (IIT Madras) & AWS Academy ML Foundations
